## FOR IMMEDIATE RELEASE

December 20, 2011

### **JIFRAM EXTRUSIONS, INC. OFFERS PROTOTYPES FOR EXTRUSIONS**

James Fischer, CEO of Jifram Extrusions, Inc. announced that the company now offers prototypes. Using prototypes, manufacturers can reduce project development costs and improve speed to market. Jifram has the capability to construct prototypes of critical new profiles that are built with precision using advanced technology.

In the past manufacturers needed to purchase samples which required a substantial investment of time and money because dies needed to be built. Now with prototypes it is easy and cost-effective because Jifram provides prototypes – customers construct samples and test their designs...all without having to invest in tooling!

Jifram Extrusions Inc., headquartered in Sheboygan Falls, Wisconsin, manufactures custom plastic profiles, custom plastic pallets and several consumer items across many product categories. Jifram's CEO, James Fischer, stated, "Jifram's prototype capability offers our customers a competitive advantage as it helps them to be first to market and secure the sale. Prototypes are just another way we are setting the standard in plastic extrusions."
